

## *fun 4 you elastic*

### artificial grass for impact-softening underlays

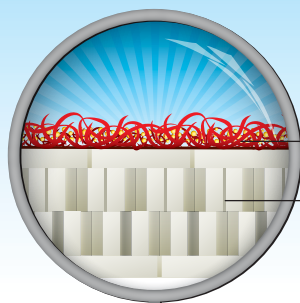

**fun 4 you elastic** is a unique, innovative system of light-weight material offering a high-quality, economical solution for building the perfect impact-softening [playground] underlay.

The system comprises of an exceptionally strong and durable, frizzy polyethylene fibre. The combination with a soft, shock-absorbing underlay of PE foam makes the system unique in its kind! The system achieves outstanding values and a maximum critical fall height of 3,2 mtr with a relatively thin, light-weight underlay construction. Moreover the system requires a sand fill of only 5 kg per square metre. All of which makes **fun 4 you elastic** an extremely competitive system!

Available in 6 colours, **fun 4 you elastic** matches perfectly with all the popular colours of modern playground equipment, offering endless scope for combination and variation!

Available in 6 colours  
to suit any playground

## fun 4 you elastic

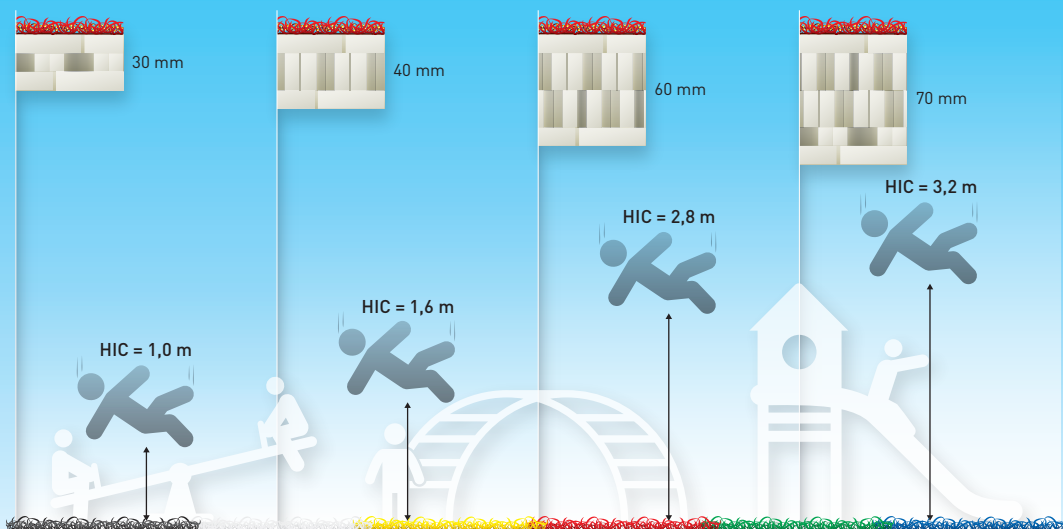

The **fun 4 you elastic** system is easy to install. The underlay mats are installed on a stable sand base and trimmed to size if necessary. Next the underlay mats are covered with a layer of artificial grass in your selected colour. The artificial grass is filled with sand.

**fun 4 you elastic** has been tested and certified to EN1177:2008 industry standards by an accredited institute. Both the certificate and test report are available upon request.
